

Venkat Dasari

• Amherst, MA • sdasari@umass.edu • (413) 829-8541 • [LinkedIn](#) • [Github](#)

Education

University of Massachusetts Amherst

Master of Science, Data Science, **GPA: 4.0/4.0**

May, 2026

Relevant Coursework: Data Science Fundamentals, Introduction to Quantitative Analysis, Data Engineering, etc.

Gandhi Institute of Technology and Management

Bachelor of Technology, Computer Science and Engineering

June, 2023

Skills

- **Programming Languages:** Python, R, C++, SQL, JavaScript, HTML, CSS
- **Tools & Technologies:** Scikit-learn, Keras, Tensorflow, Flask, Node Js, React Js, Express Js, Apache Airflow, Data Build Tool (DBT), Docker, Git
- **Databases:** MySQL, MongoDB, Snowflake
- **Interests:** Data Science, Machine Learning, Artificial Intelligence, Natural Language Processing, Data Engineering, Web Development

Experience

University of Massachusetts Amherst

Research Assistant

Amherst, Massachusetts

November, 2024 – Present

- Review literature and design computational frameworks for core values and typologies in political philosophy
- Conduct thematic text analysis on American political writings using Large Language Models (LLMs), with a focus on advanced prompt engineering
- Constructed a dataset of 500 books with annotated political value scores, sentiment scores, and ideological classifications
- Performed statistical analyses such as latent class analysis (LCA), and Krippendorff's alpha to ensure validity and reliability, achieving an 80% overall agreement

Tata Elxsi

Engineer Intern

Trivandrum, Kerala

February, 2023 – June, 2023

- Designed and developed a seamless user interface (UI) for a resume parsing application, enhancing user experience and streamlining workflows for HR and project management teams
- Identified parsing issues and implemented robust error and exception handling scripts, increasing the reliability and processing efficiency of the application by 20%
- Researched embedded product engineering and communication systems in automotive applications, and delivered daily presentations to the team

Projects

1. [Statistical Network Modeling of Post-Cold War Global Diplomacy](#)

- Constructed a global diplomatic network for ~140 countries, from 1995 to 2005, using data from the Correlates of War project
- Applied Temporal Exponential Random Graph Models (TERGMs) to statistically model and analyze patterns of diplomatic tie formation
- Identified strong reciprocity, transitivity, and decentralization in post-Cold War networks, indicating a shift toward interest-driven, multipolar international relations

2. [Anti-Phish: Phishing Detection using Machine Learning](#)

- Extracted 20+ features from 10,000 website URLs and built a comprehensive dataset
- Performed a comparative study of Supervised Learning algorithms and implemented a robust XGBoost model, achieving 95% accuracy in classification
- Integrated the final model into a flask-based web application, enabling real-time phishing detection for end-users

Publications

1. S. S. P. Naresh, R. Talasu, D. S. S. P. Venkat, S. K. Korada and B. K. Mohanta, "Real Time Vehicle Tracking using YOLO Algorithm," 2023 14th International Conference on Computing Communication and Networking Technologies (ICCCNT), Delhi, India, 2023, pp. 1-5, doi: 10.1109/ICCCNT56998.2023.10307265.

Achievements & Extracurriculars

- Secured an All India Rank (AIR) of 20 in National Engineering Olympiad 6.0
- Represented Tier 1 & Tier 2 organizations in PUBG MOBILE tournaments as an academic esports athlete and was a finalist in 4 tournaments
- Actively participated in the activities and events conducted by The Bharat Scouts and Guides which helped me develop life skills

Certifications

- [Machine Learning with Python by IBM](#)
- [Introduction to Artificial Intelligence by IBM](#)
- [Software Development Processes and Methodologies by University of Minnesota](#)
- [Technical Support Fundamentals by Google](#)
